

Optimum Indoor Ventilation

The ComfoAir Q is an intelligent, ultra efficient heat recovery ventilation system that provides a healthier more comfortable indoor space. New integrated technologies help to deliver market leading performance including efficient heat recovery (up to 96%), low noise generation and reduced power consumption. Temperature and humidity sensors allow the unit to respond automatically to changing environmental conditions and deliver low maintenance trouble free operation.

The ComfoAir Q extracts the heat energy, which would have otherwise been lost through the normal exhaust processes, and transfers this to the fresh, filtered supply air which is drawn in from outside.

Features

- 3 sizes available to suit medium to large size homes; Q350, Q450 and Q600
- Unique diamond shaped counter-flow heat exchanger maximises heat transfer whilst minimizing pressure drop
- Fully optimised impeller and housing design ensures effective performance and a highly efficient air flow path
- Automatic 100% filtered bypass
- ComfoWell attenuators ensure quiet operation in all rooms

Engineered for Maximum Efficiency

The unique diamond shaped heat exchanger features a larger surface area, which provides a higher level of efficiency. The exchanger features fully optimised channel heights to ensure a constant air flow with lower pressure loss.

The ComfoAir Q, counter-flow exchanger operates in energy recovery mode to maximise heat recovery transfer throughout the year. Summer bypass operation can also be used to allow cooler air to be brought directly into the building, when the inside temperature has increased above the comfort temperature.

- Recovers thermal energy from stale air extracted from the building
- Available with sensible and enthalpy counter-flow exchanger
- Enthalpy counter-flow models also recover latent energy allowing dehumidification in humid climates
- Proportional bypass provides more accurate temperature and humidity control
- Large exchanger size ensures minimal pressure drop, efficient power usage and low noise generation

Summer Bypass Mode

Technical Data

ComfoAir Q350

Airflow m³/h	Pressure Pa	Power Watts	Sound Level dB(A) @ 3m
150	25	16	16.0
200	50	31	20.1
245	50	43	22.6
250	100	59	24.9
300	100	77	27.6
350	100	98	30.5
250	150	74	26.9
250	200	88	28.9
300	200	108	31.0
350	200	131	33.4

ComfoAir Q450

Dimensional Data

Specifications

Weight: 50kg

Ducting: 4 x Ø160mm spigots – Q350/Q450

4 x Ø180mm spigots – Q600

Condensate connection: 32mm

Construction: Internal body - Polythlene

Unit housing - ABS

Fan motors: EC

Filters: Extract - G4

Supply - F7
